

# Project on Research in Medical Education (PRIME)

Wednesday, January 23, 2008

8 - 9:30 a.m.

Sanger Hall, Room 1-050\*

(\*NOTE NEW LOCATION)

## *Designing a Task-Based Elective for Senior Residents that Addresses the ACGME Competencies*

- This presentation describes a curriculum designed for a transesophageal echocardiography rotation for senior level anesthesiology residents. It is a task-based elective course centered around the six ACGME competences.
- The presenter will **describe the course design, including needs assessment, goals and objectives, curriculum, and course and learner assessment.**

This course serves as a model for design and implementation of other specialized clinical training programs where ACGME competencies need to be addressed.

**Mark T. Nelson, M.D.**

Assistant Professor of Anesthesiology

Director, VCU Perioperative Echocardiography

MEd in Medical Education Pilot Program Student

Continental Breakfast will be served.

sponsored by the Curriculum Office in collaboration with the Office of Faculty and Instructional Development, VCU School of Medicine on the MCV Campus. For questions, please contact Deborah Stewart at 8-6591.
