Teaching in Medical Education (TiME) Faculty Fellows Program

Developing MCV faculty as teachers and scholars in health professions education

Teresa (Terry) Carter, EdD
Professor and Associate Dean for Professional Instruction and Faculty Development
VCU School of Medicine
What is TiME and how does it work?

TiME is our name for a series of graduate courses in medical education for MCV faculty in medicine, dentistry, nursing, and other health professions at VCU.

Faculty may enroll in a single course, or apply to earn a Graduate Certificate in Medical Education through the School of Education at VCU.

Upon completion of 12 credit hours (six, 2-credit courses), faculty can earn the graduate certificate.
Goals for the TiME Program

- Enhance depth and breadth of faculty expertise to support teaching and learning in the health professions
- Foster the development of a cadre of academic leaders who can model best practices in teaching within undergraduate, clinical, and graduate programs
- Promote leadership in the scholarship of teaching and learning (SoTL) in health professions education
Graduate Courses in the Program

**Required to earn the Certificate**

- Instructional Strategies
- Curriculum Design
- Adult Learning Theory and Practice
- Teaching as Scholarship

**Electives (Choose two)**

- Performance Feedback and Simulation
- Group and Team Facilitation
- Using Digital Media in Teaching
- Reflective Practice
What are the expectations for completing a course?

Each course is designed for practical application of skills and knowledge learned in the work environment.

Faculty can expect approximately 6 hours per week needed for class time, readings, and individual or group assignments.

Classes meet in the McGlothlin Medical Education Center on the MCV Campus from 5:15-7:45 pm one evening a week during the 12-week semester.
How do you pay for a TiME course?

Faculty whose work status enables them to be eligible for tuition benefits from the University have access to a tuition waiver (full-time VCU faculty).

Other faculty in the health professions at VCU usually have tuition assistance from the VCU Health System (Ed Assist) or they can request tuition support from the home institution (VAMC).

For Fall semester, 2017

Required to earn the Certificate

- Instructional Strategies
- Curriculum Design (Mondays)
- Adult Learning Theory and Practice
- Teaching as Scholarship

Electives (Choose two)

- Performance Feedback and Simulation
- Group and Team Facilitation
- Using Digital Media in Teaching
- Reflective Practice (Thursdays)
For Spring semester, 2018

Required to earn the Certificate

- Instructional Strategies
- Curriculum Design
- Adult Learning Theory and Practice
- Teaching as Scholarship

Electives (Choose two)

- Performance Feedback and Simulation
- Group and Team Facilitation
- Using Digital Media in Teaching
- Reflective Practice
For Summer semester, 2018

Required to earn the Certificate
- Instructional Strategies
- Curriculum Design
- Adult Learning Theory and Practice
- Teaching as Scholarship

Electives (Choose two)
- Performance Feedback and Simulation
- Group and Team Facilitation
- Using Digital Media in Teaching
- Reflective Practice
